DOUBLE WOOD DETECTIVE

IKE Insight

Manage double wood population and improve safety

Don’t let your double wood backlog grow any longer

IKE HELPS YOU DETECT AND VALIDATE FASTER

It starts with accurate double wood records

Double wood (also known as buddy pole or two pole) is a common issue for many utilities. When unaddressed, it creates a serious safety hazard and liability.

Pinpoint instances of double wood with minimal in-field time

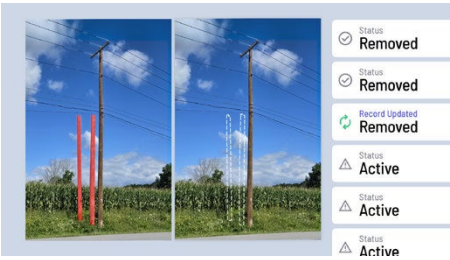
Double Wood Detective from IKE Insight helps you identify or validate double wood instances while avoiding resource-intensive field inspections.

Search at scale

Our pole-specific AI capabilities locate double wood instances at a network-level using street-level imagery.

Improve safety and reduce liability

Leverage our insights to address an important public and worker safety concern and insurance risk.



Ensure accurate records

We deliver accurate double wood records, including finding undetected instances and updating pole removal status.

IKE IS TRUSTED BY

5 of the 10

largest communications companies in the U.S.

IKE IS TRUSTED BY

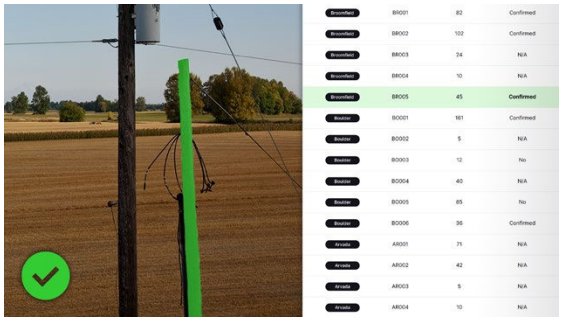
8 of the 10

largest investor-owned electric utilities in North America

Keep your projects on track with intelligent automation

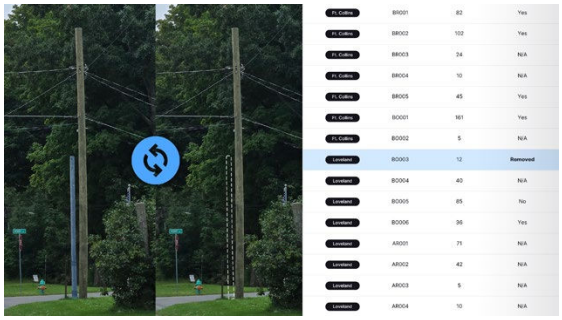
Detect

Locate undetected instances of double wood.



Validate

Confirm instances of double wood from existing records.



Change detection

Capture changes to double wood records, such as pole removal status.
